

**ALL CASE IH BELOW THE SEED OPTION
PLANTER FERTILIZER TUBE PART # 18197 (GXSST125CASE)**

(Read Instructions Completely before Beginning Installation)

Installation Steps:

Before you begin, verify the “package contents” to ensure all items are included.

Step #1: Disassemble planter to be able to install fertilizer tube in center of shoe on planter.

Step #2: Install tube using existing bolt and bolt hold in shoe as shown in the below photos.

Step #3: Run ¼” fertilizer line down to, and through, the tube as shown; leaving approximately 5/8” sticking out of the bottom, in front of the firming point.

Step #4: Make sure you zip tie your fertilizer line in various areas to your planter.

This is not a maintenance free fertilizer tube!

It is recommended that each time you fill your planter with seed you check these tubes for soil build-up in the shoe area.
