## AGXCEL INSTALLATION GUIDE FOR THE JD 1790 PLANTER

(Read Instructions Completely before Beginning Installation)

**JD 1790 PLANTER BRACKET**

## **Installation Steps:**

**Before you begin, verify the “package contents” to ensure all items are included.**

This document serves as a guide for the installation of the AgXcel 1790 bracket for mounting the GX line of liquid fertilizer application systems. The 1790 bracket mounts on the rear of the planter between the lift assist wheels as shown in the picture below.

There are 4 - 2x6.5 bolts that will mount the 1790 bracket to the 2x6 frame. Position the 1790 bracket so that it does not interfere with any seed tubes, hoses or harnesses. Bolts will be installed from the bottom of the frame to the top and then through the 1790 brackets.

Now that the 1790 bracket is installed, you can now mount the AgXcel GX2 or GX5 system on top of the 1790 bracket.
