

Finally, a system that Measures, Collects, Monitors, and Analyzes the liquid placed on your most valuable asset.

GX7d
Intelligent Liquid Monitoring

Row-by-Row Liquid
Rate Monitoring System

www.agxcel.com

GX7d-Net

The GX7d-Net is an intelligent network that captures real-time liquid flow rate information. GX7d-Net's precision flow sensors can measure from 0.03 - 2.3+ GPM applications rates.

GX7d-Hub

The GX7d-Hub collects flow rates from each row, GPS, speed, and other environment data. GX7d-Hub stores job information and provides it wirelessly to GX7d devices.

GX7d-Insight

GX7d-Insights is an online tool that allows you to analyze your liquid placement after the job is done. Export to your farm management system to compare your yeild affect year over year.

GX7d-App

No more guessing, cameras, or floating balls. The GX7d-App alerts when there is a problem, but more importantly, let's you know how much liquid is being placed at all times.
