Product!

The AgXcel GX50 N-Fuse is a state-of-the-art high pressure chemical injection solution designed for high accuracy with anhydrous compatible products injecting into an ammonia anhydrous nurse tank. The GX50 N-Fuse is capable of injecting into an anhydrous pill tank at high volumes reaching up to 11 gallons per min.

- 120v 20amp configuration
- 10 gallons/min @ 200 PSI
- High performance positive displacement pump
- 2 HP 3600 rpm self cooled motor
- Heavy Duty powder coated chassis
- Resistive touch screen
- Easy to use programming
- Industrial push button operation

Pump Features:

- 115v AC and 230v AC configurations
- Low maintenance pump that can draw even the most viscous liquids in cold weather
- Up to 11 gpm
- Industrial GFI Setup

* Available Add-on Components*

- Hose
- Nozzles

- Solid design to withstand the most demanding environments
- Utilizes the AgXcel Mag Flow meter for unparalleled accuracy
- Durable Resistive touch screen
