GX 50 LFP GAS

Precision Liquid Fertilizer Solutions

116 E. 6th St., Kearney, NE 68847
877.218.1981

The AgXcel GX50 N-fuse Gas series is specifically designed for in field applications, for safely injecting nitrification inhibitors into Anhydrous Ammonia.

The solution is able to inject into an anhydrous nurse tank located in the customers field at up to 11 GPM at 200 psi. Multiple features keep this system and the end-user safe. Give AgXcel a call for additional details and requirements.

- Full tank 1.5 hours of usage at full throttle
- Full tank 3 hours of usage at 50% throttle
- No need for electrical power

- Pull start engine
- 86 Octane or higher
- Universal mounting bracket
- Sotera Flow Meter

- 230 PSI safety bypass back to tank
- Adjustable relief valve
- Safe and simple to use

ABOUT US

AgXcel expanded our line of Precision Fertilizer Application Systems and this expansion has allowed us to focus on quality, accuracy and customer service. Our extensive line of GX systems is designed to fit any producers needs. We are continually seeking ways to improve our product line by working with local farmers.

OUR SERVICES

AgXcel the leader of innovative precision liquid fertilizer solutions and seed placement tools has over 35 years of experience built into our solutions and we are sure we have a solution that meets your season needs. AgXcel also designs and manufactures custom chemical injection systems for insecticides, pesticides and inoculant's injection.
