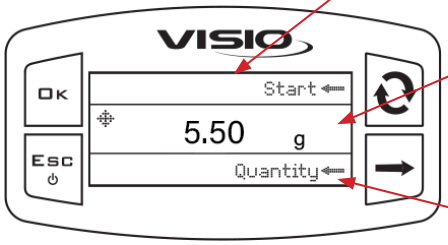
LITE TREATER

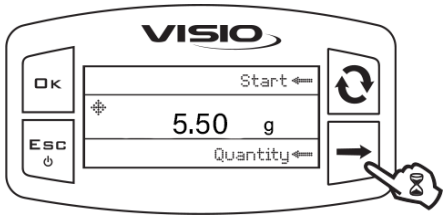
PN#55720



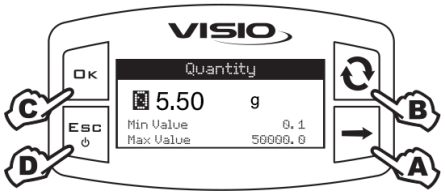
-top part
item START refers to the key on the side which allows user to start the procedure (key).

-central part
the value is the set filing quantity (in gallons). On the side, the symbol is displayed.

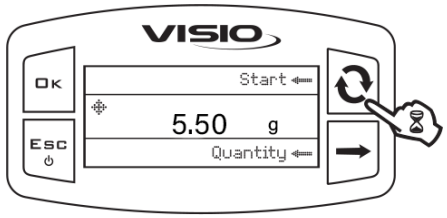
-bottom part
item Quantity refers to the key on the side which allows user to set tank filling value (key).



1) Press key for 2 seconds to open the manu for setting the filling quantity.



2) Set filling quantity:
A) Press to move through digits.
B) Press a few more time to edit the highlighted digit.
C) Press to save changes, or
D) Press to quit the page without comfirming changes.

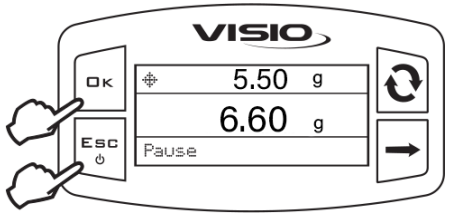


3) Keep key pressed for 2 seconds. This will start the system.
Filling will begin. The system will stop automatically when completed.

The display shows the following data:
- top part: set filling quantity;
- central part: partial totalizer;
- bottom part: instant flowrate.

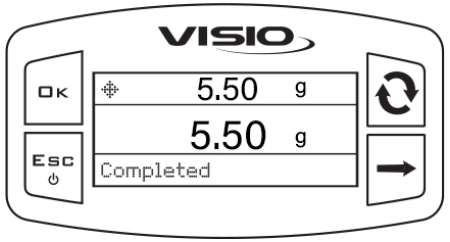
Press key several times to view a value in extended mode until required value is displayed in central part.

Displayed values cannot be edited.



Tank filling can be interrupted at any time by pressing ESC. Pause message will be shown at the bottom of the display.

Press OK to resume filling; press ESC to stop filling and display will go back to initial page.



When set quantity is reached, filling stops automatically. Completed message will be shown at the bottom of the display.
